Cyclical® Filaments for Mattress Ticking.

Texturized polyester filaments specifically designed to provide volume and comfort to mattress fabrics.

These are some advantages of working with us:

By being part of Cyclical, you contribute to a positive environmental impact.

Get our product just in time to capitalize on your market opportunities.

Experience technology, innovation, and versatility of use in all our filaments.

Ensure your supply and availability in case of any eventuality.

Expand markets in North America thanks to regional tariff advantages.

T-MEC

We have a strategic geographic location.

We take advantage of nearshoring benefits such as:

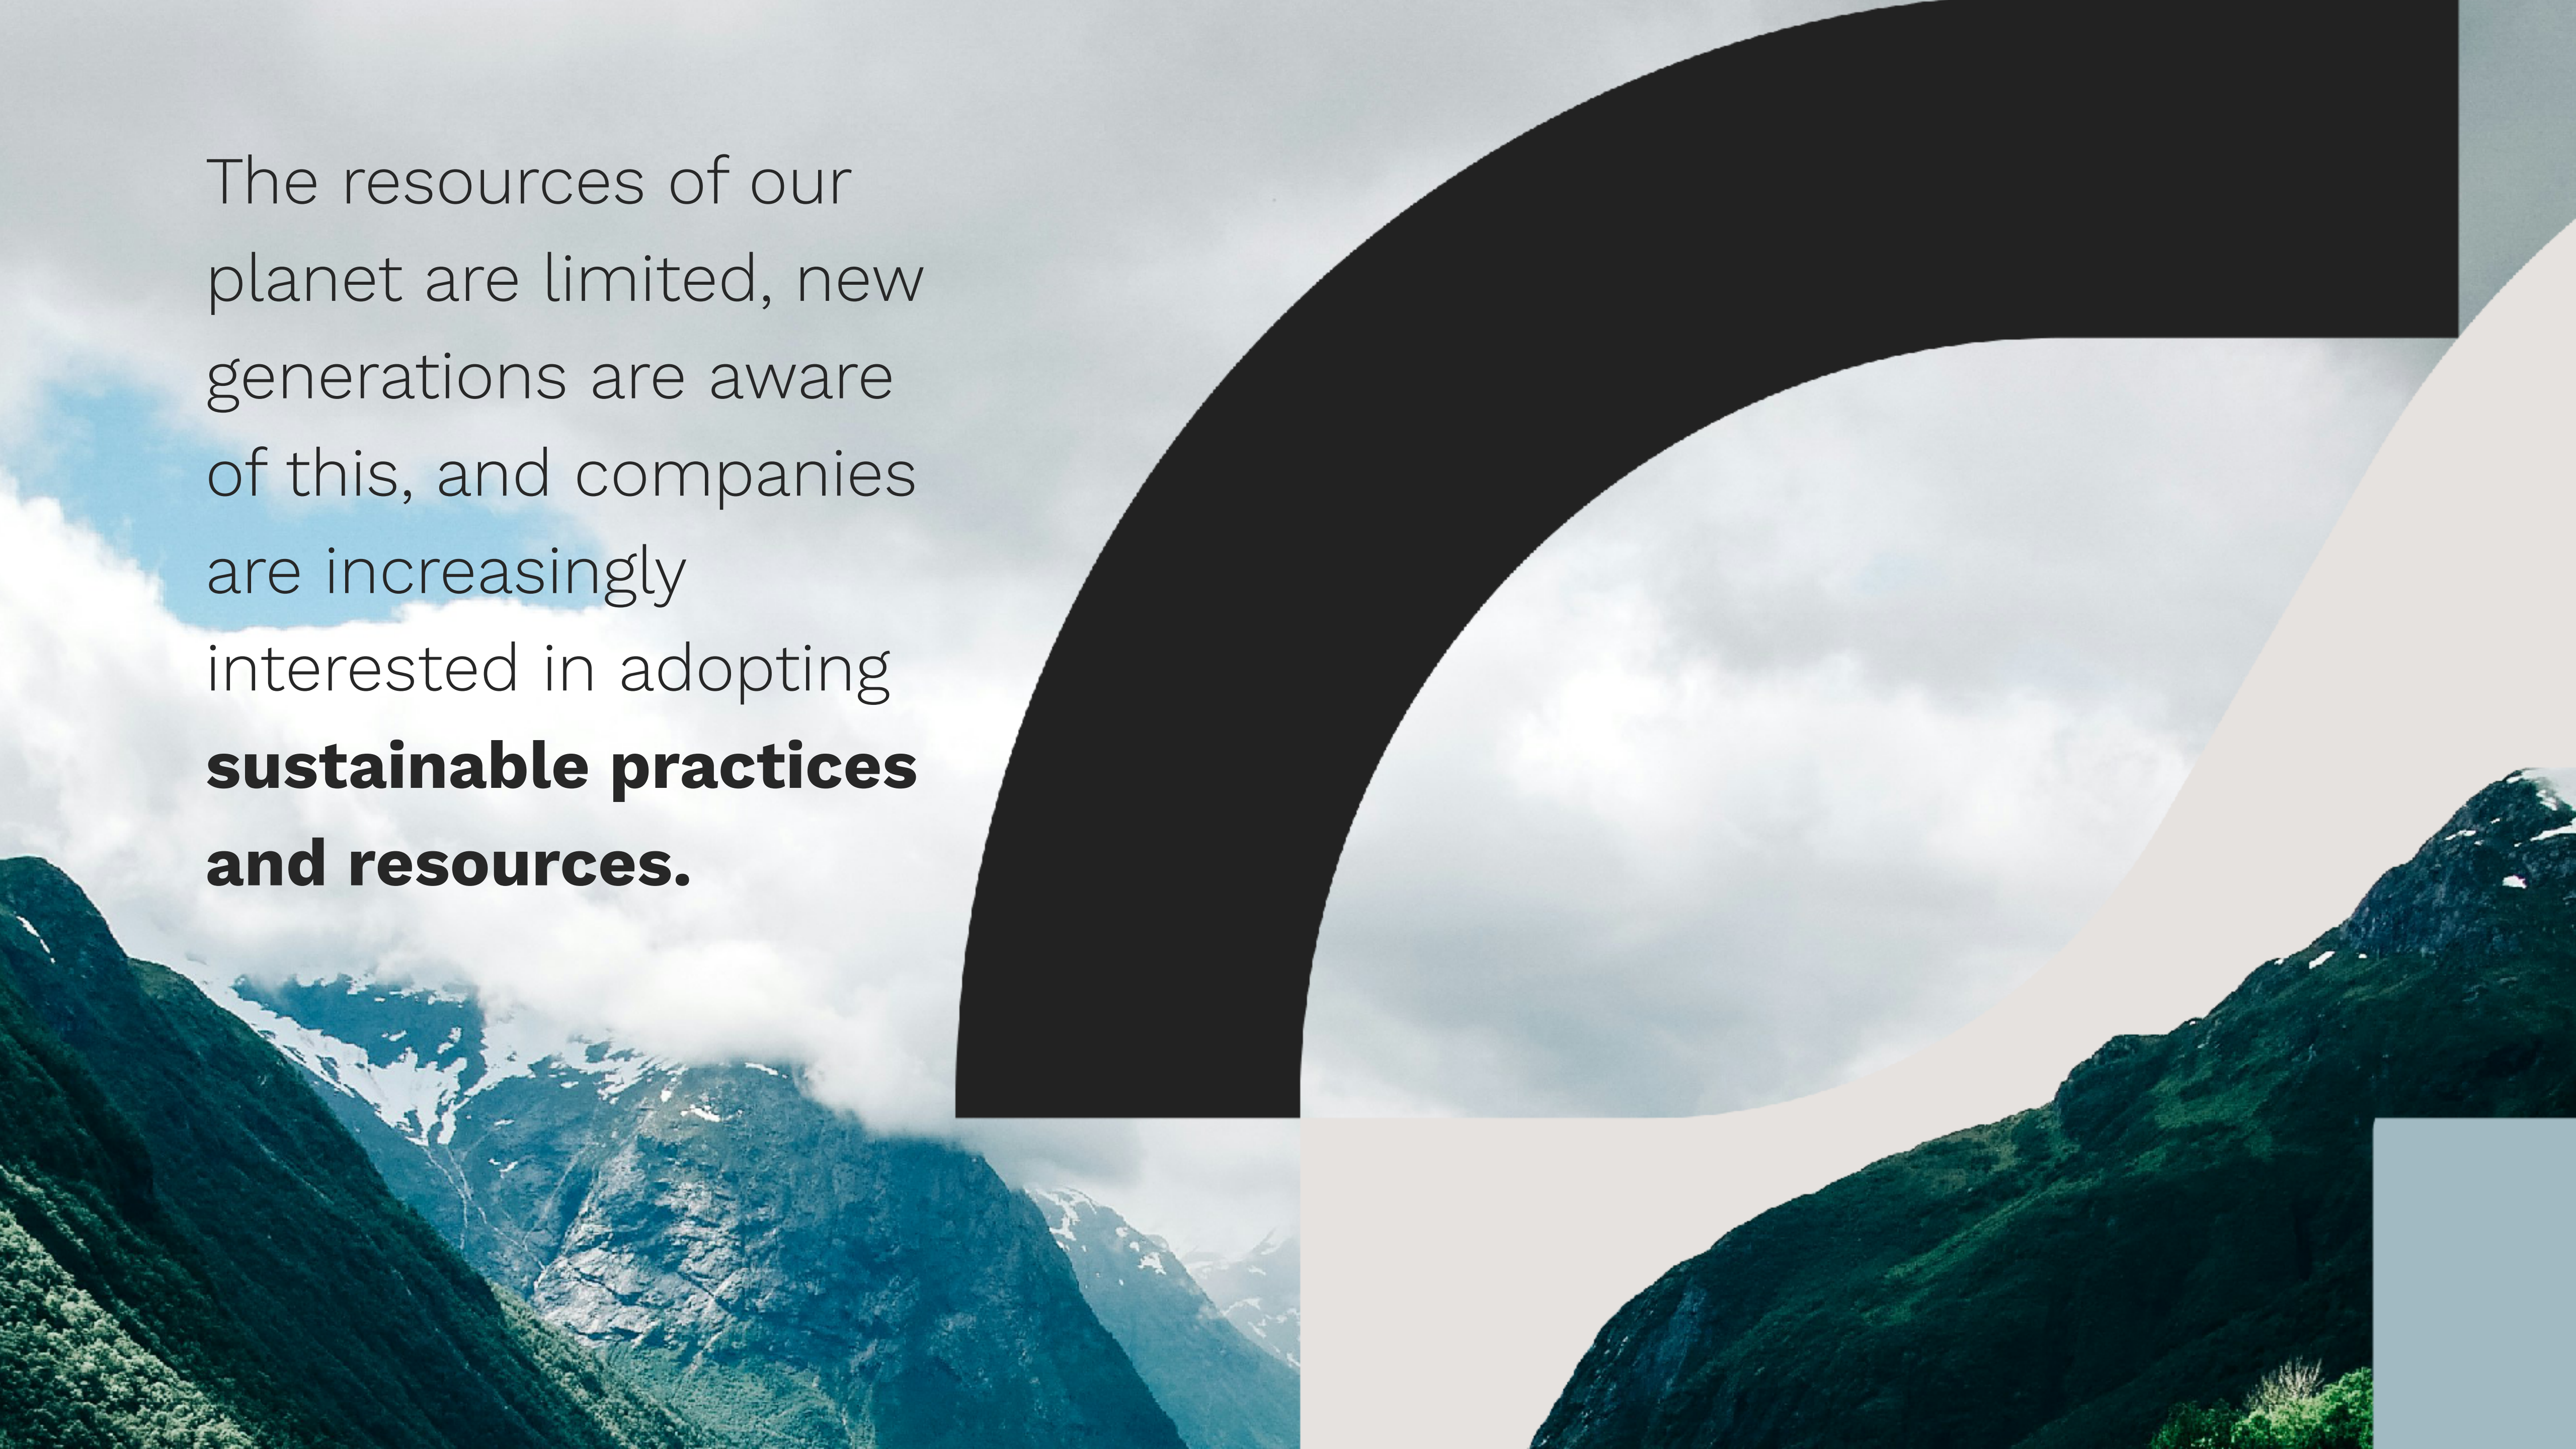

- Service availability aligned with North American time zones.
- Trade preferences due to free trade agreements.
- Proximity to meet regional requirements.

Be part of the leading companies that are
joining our **textile evolution.**

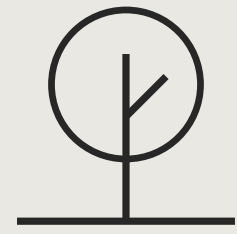

The resources of our planet are limited, new generations are aware of this, and companies are increasingly interested in adopting **sustainable practices and resources.**

An aerial photograph of a winding asphalt road through a dense, green forested mountain landscape. A large, white, curved graphic element, resembling a stylized 'C' or a road curve, is overlaid on the left side of the image. The text 'LET'S USE IT AGAIN' is written in a large, white, serif font across the right side of the image, partially overlapping the forest and the white graphic.

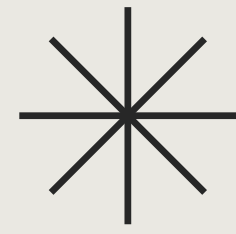

LET'S
USE IT
AGAIN

Motivated by **economic, social, and environmental reasons.**

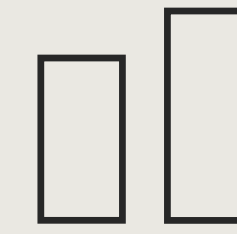

Environmental

- Contribution to act against climate change.
- Regulatory compliance.

Social

- Being part of the market that uses sustainable products.
- Reputation and social responsibility.

Economics

- Operational efficiency and cost reduction.
- Innovation and competitive advantage.

The market is already changing.

Be part of the
textile industry
in the **America**
that evolves and
adapts with
Cyclical.

We are backed by **30 years of experience in the textile** industry, always committed to environmental care.
